ORGANISE  
AGAINST  
**CORONAVIRUS**

## How can we defend our communities against coronavirus?

The ANC government is clearly not serious about protecting the lives of working class people and poor communities against the coronavirus. They assured the country that they are ready for Covid 19 but they only delivered sanitisers in poor communities like Alex, Duduza and Umlazi **after** infections were reported!

The message is very clear – **poor communities you are on your own!** Let us not wait for our people to die. Let us arm ourselves with knowledge, organising and fighting the virus!

Only a **determined struggle** will change the attitude of the ANC government to start taking the health and safety of communities seriously.

### **We MUST intensify the fight for:**

- Water and sanitation
- **Free** testing facilities for all
- **Free** distribution of appropriate masks
- **Free** treatment for ALL.

Communities must continue to call for **safer transport and working conditions for essential workers.**

The state **MUST** give a **voucher of at least R2000 per unemployed family for food and other essentials to survive the virus.**

**All out in defence of our communities!**
